# DYSON JONES

WOOL MARKETING SERVICES

**Minimum Bale Weight  
120 kgs  
Maximum Bale Weight  
204 kgs**

**Presenting bales outside this range costs  
growers money and seriously affects  
procedures during marketing and  
processing wool.**

A conversion table is provided at the rear of  
this booklet.

Underweight bales cause significant disruption to wool marketing.

## CONTAMINATION

costs the Australian Wool Industry millions of dollars every year.

Ensure that every bale is **COMPLETELY FREE** of harmful foreign material.

## CONTAMINATION

is also caused by incorrectly mixing different wool types within a bale **AND** incorrect bale branding.

Only ever use **PAPER** as a divider in Bales destined for rehandling.
